## FEED GRAIN STOCKS DOWN - WHEAT AT 8-YEAR HIGH

Total stocks of the four feed grains (corn, oats, barley, and sorghum) on October 1, 1971, amounted to 50.6 million tons, 21 percent less than the 64.2 million tons a year earlier, according to the Crop Reporting Board. Large declines were noted in corn and sorghum while barley and oats were relatively unchanged.

Stocks of all wheat were 4 percent above a year earlier and the highest in 8 years with durum wheat stocks up 22 percent. Rye stocks were a third larger, while holdings of flaxseed were 5 percent lower than a year ago.

All wheat in storage October 1 totaled 1,876 million bushels, 4 percent above a year earlier and the highest October stocks since 1963. Off-farm stocks of 1,053 million bushels were 6 percent below a year earlier but farm holdings of 824 million were record high and 22 percent above a year ago. Disappearance from all storage positions during July-September is indicated at 482 million bushels, compared with 465 million a year earlier. The Commodity Credit Corporation owned 376 million bushels of the total wheat stocks and had loans outstanding on an additional 420 million.

Durum wheat stocks in all positions on October 1 totaled 127 million bushels, 22 percent more than a year earlier but 2 percent less than 2 years earlier. Farm holdings of 100 million were 27 percent above last year and off-farm stocks of 27 million were up 6 percent. Disappearance during July-September 1971 is indicated at 12.9 million, compared with 23.6 million a year earlier.

Rye stocks in all storage positions on October 1 totaled 65.0 million bushels, 32 percent more than a year earlier and 70 percent above October 1, 1969. Off-farm stocks, at 36.2 million bushels, were 30 percent more than a year earlier and farm stocks were up 35 percent. Indicated disappearance during July-September was 15.2 million bushels, compared with 10.6 million a year earlier. The Commodity Credit Corporation owned 25.0 million bushels of the total rye stocks and had loans outstanding on 11.1 million.

Old crop corn stored in all positions on October 1 totaled 665 million bushels, 33 percent below a year earlier and the lowest for this date since 1952. Old corn stored on farms, at 425 million bushels, was 25 percent less than last year and stocks in off-farm facilities, at 240 million bushels, were down 44 percent. The Commodity Credit Corporation owned 105 million bushels of corn and had loans outstanding on 234 million bushels.

October 1 stocks indicate a July-September disappearance of 898 million bushels of old crop corn, 3 percent less than the 924-million-bushel disappearance for the same period last year.

Oat holdings in all storage positions on October 1 totaled 1,097 million bushels, just a fraction under last year's record high but 7 percent above holdings October 1, 1969. Off-farm holdings of 280 million bushels are a new high for October 1 (34 million above last year's old record and 87 million above October 1, 1969). Farm holdings of 816 million bushels are lower than October 1 farm stocks the last 2 years.

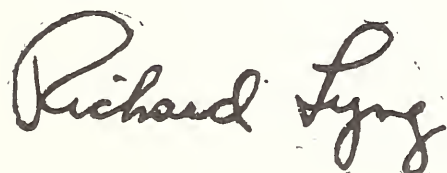

Disappearance during the July-September 1971 quarter was 301 million bushels, about the same as the 302 million the same quarter last year. Exports during July-September were drastically below past years.

As of October 1, the Commodity Credit Corporation owned 199 million bushels and had loans outstanding on another 205 million bushels of oats.

Barley stored in all positions on October 1 totaled 495 million bushels, 1 percent more than a year earlier. Off-farm stocks of 172 million bushels were 6 percent below a year ago but farm stocks, at 323 million bushels, were 6 percent above a year earlier. Of total barley stocks the Commodity Credit Corporation owned 37 million bushels and had loans outstanding on 95 million bushels. Disappearance during July-September was 132 million bushels, down 17 percent from the 158 million bushels a year earlier.

(Continued from page 2 )

Old crop sorghum grain stored in all positions on October 1 totaled only 91 million bushels, 63 percent below last year and the smallest October 1 stocks since 1957. Both on-farm and off-farm stocks are down nearly two-thirds from October 1, 1970. Of the total supply, off-farm storages held 77 million bushels and farm storages nearly 14 million bushels.

Disappearance during July-September was 87 million bushels, compared with 103 million in 1970. Improved pastures in the Southwest reduced the need of sorghum grain for feed. The Commodity Credit Corporation owned 65 million bushels of total stocks and had loans outstanding on an additional 5 million bushels.

Flaxseed stocks in all positions on October 1 totaled 41.3 million bushels, 5 percent less than a year earlier. Off-farm stocks, at 31.2 million bushels, accounted for three-fourths of the total and were 2.9 million bushels more than October 1970. Farm stocks totaled 10.1 million bushels, 5.2 million less than a year earlier.

Current stocks indicate a disappearance during July-September of 5.5 million bushels, compared with 8.2 million a year earlier. Flaxseed supply is estimated at 46.8 million (carryover of 26.8 million plus production of 20.0 million bushels). Crushings during the quarter are estimated at 4.9 million bushels. Exports of only 4 thousand bushels were well under comparable quarters of past years.

Of total flaxseed stocks, the Commodity Credit Corporation owned 24.3 million bushels and had loans outstanding on an additional 3.0 million bushels.
